

Which of the following areas of support are you seeing the *fastest increase in demand* for from your faculty?

Texas Library Association

Carolina Consortia Meeting

The “Researcher of The Future” poll was executed to gain insight from librarians on the research-related support that’s being demanded of them by faculty. The poll asks librarians to select the colored token that best represents the area they see as having the fastest increase in demand. Below are the combined results from the polls conducted at the 2019 TLA and Carolina Consortia conferences.

52 Librarians participated

at two regional 2019 conferences in the SE & SW United States.

Research Skills Training (incl. discovery, reading, and citing trustworthy material)

Open Access Publishing (incl. funding and repositories)

Research Data Management

Guidance on Disseminating and Publishing Research

Bibliometrics, Almetrics and Impact

The combined results of the two polls indicate that the top 3 research-related support areas with the fastest increase in demand are:

Research Skills Training, Open Access Publishing, & Research Data Management
