

Taylor & Francis Archives complement current content in libraries and allow researchers to explore centuries of academic excellence across 28 key subject disciplines.

We have **MORE THAN 65** Nobel Prize winning authors' research in our Classic Archive content – with **OVER 450** of their articles

IN THE PAST

YEARS

Mentioned on Twitter over **13,800** times!

Mentioned on Facebook over **1,100** times!

Mentioned by News Outlets over **1,700** times!

Our journals have been cited **1,300,000+** times!

Since 1980, research from our Classic Archive has influenced

OVER 11,000 government policy documents [**AND**] **OVER 27,000** patents

Our Most Cited Classic Archive Journals:

Philosophical Magazine
OVER 127,000

Journal of the ASA
OVER 80,000

Journal of Natural History
OVER 66,000

Technometrics
OVER 20,000

Molecular Physics
OVER 19,000

Our Most Cited Classic Archive Articles Over The Last Five Years:

OVER 5,500

LIII. On lines and planes of closest fit to systems of points in space, 1901

OVER 5,000

XCII. Relations between the elastic moduli and the plastic properties of polycrystalline pure metals, 1954

OVER 4,000

The Satisfaction With Life Scale, 1985

OVER 3,000

Nonparametric Estimation from Incomplete Observations, 1958

OVER 2,500

The calculation of small molecular interactions by the differences of separate total energies. Some procedures with reduced errors, 1970

The Classic Archive features content published before 1997, back to the journal's very first volume where available.
