

[Institution name]

has access to a powerful cutting-edge database of chemistry and physics reference resources.

Save time and expand your resources with easy, flexible access to trusted chemical and physical data.

Interactive,
Time-Saving Tools
and More Data

Access expanded
data and customize
its display

Search, sort,
and merge data with
ease and accuracy

The Online Handbook

EXTENSIVE SEARCH CAPABILITIES

- **Searching by Various Fields**
Physical property, molecular formula, etc.
- **View Chemical Entry**
See core chemical properties and link to tables in handbook
- **Cross Table Searching**
Displays everything about a specific compound
- **Chemical Structure Searching**
Use the free structure editor to draw a desired structure
- **Interactive Tables**
Customize the data in spreadsheet format

KEY FUNCTIONALITIES

- Create individual workspaces and customize your search screen
- Access from any device – mobile, tablets, etc.
- Graph search results and data tables
- Export chemical structures and images
- Expanded versions of print edition tables
- Access to tables archived from earlier editions
- Ability to export into Excel to print & filter
- ACCESS archived PDF versions of earlier editions (back to 84th edition)
- INSTANT access to your specific search criteria – customized data to suit your needs

One of the most practical benefits of this database system is that you can search by chemical structure
