Opening up choices for today's researchers

Taylor & Francis open access agreement with Bibsam

Taylor & Francis and Bibsam have an agreement to support open access publishing at your institution. As a member of Bibsam, corresponding authors at participating institutions are potentially eligible for open access funding.

What does this open access agreement mean for authors?

When an article is published gold open access, the final published version (or Version of Record) is permanently and freely available online, often upon payment of an Article Publishing Charge (APC).

As part of this open access agreement with Taylor & Francis, corresponding authors at Bibsam institutions may be eligible to have their article published gold open access with a fully funded APC.

Which journals are covered by this agreement?

Articles accepted for publication in all Taylor & Francis Open Select (hybrid) journals are eligible to be published open access using this agreement. Articles in our fully open access journals are not covered.

Only original research papers are covered by the agreement.

How are articles approved for open access publishing using this agreement?

Librarians have access to the Taylor & Francis Research Dashboard, allowing them to view all metadata for accepted articles by authors at their institution upon acceptance. The librarian then uses the Research Dashboard to approve or decline articles for open access.

How will authors know if their article has been approved for open access publication?

Shortly after their article is approved, authors will receive an email notification. They will be asked to choose an open access licence for the article. More information is available at authorservices.taylorandfrancis.com

Speak to your librarian to find out more!

Which articles are covered by this agreement?

To be eligible for funding, the corresponding author will need to be based at a participating institution within the Bibsam consortium and be publishing a paper in a Taylor & Francis or Routledge Open Select (hybrid) journal.

If the journal has additional costs, such as page charges or color charges, these fees will still apply and will not be covered by the agreement.

Are all types of publication included?

Some articles which are not original research papers, such as Editorials, Announcements, and Book Reviews, are not covered by this open access publishing agreement.

What are the dates of the agreement?

The article will need to be accepted for publication between Jan 1, 2018 and Dec 31, 2020.

License options

Taylor & Francis
**OPEN
SELECT**

Our Open Select (hybrid) journals offer a choice of two licenses:

CCBY (Attribution)

- Others can distribute, remix, tweak, and build upon the article
- Original author must be credited
- Can reuse commercially

CC BY-NC-ND (Attribution-Non-commercial-No Derivatives)

- Others can download article and share it with others
- Original author must be credited
- Article can't be changed in any way
- Cannot reuse commercially

The screenshot shows the 'AUTHOR SERVICES' page with a search bar and navigation menu. The main content area is titled 'Open access funding for authors in Sweden' and includes a sub-heading 'How researchers at Swedish institutions can publish OA at no cost to themselves'. The text explains that authors based at participating institutions in Sweden may be eligible to publish gold open access in Taylor & Francis and Routledge Open Select (hybrid) journals at no extra cost. It mentions a centrally-funded scheme organized by the Swedish Bibsam consortium. A section titled 'What should I do if I want my research to be made open access?' provides instructions on how to request funding. Another section, 'How can publishing open access benefit you?', lists benefits such as increased visibility, greater impact, and more freedom. The page also features a 'Latest tweets from @tandfonline' section and a 'Advancing open data' banner.
