# CONVERTING YOUR BOOK OR CHAPTER TO OPEN ACCESS AFTER PUBLICATION

At Taylor & Francis, we offer retrospective open access which allows a book or chapter that has previously been published with Taylor & Francis to be converted to open access.

When you convert your previously published book or chapter to open access, you are unlocking your research to be discovered online by researchers across the globe. It involves the payment of a book processing charge (BPC), and selecting a Creative Commons licence to protect the work.

We have collaborated with researchers to build one of the largest open access book and chapter collections and are delighted to be able to showcase open access book and chapter content across all subjects covered by Routledge, CRC Press and our other imprints in the humanities, sciences, social sciences and behavioural sciences.

Learn more about publishing your work open access, funding options to cover book publishing charges, copyright licenses available and more by getting in touch with our dedicated Open Access Books team who are here to help. [oabooks@tandf.co.uk](mailto:oabooks@tandf.co.uk)

Taylor & Francis Group  
an **informa** business

“Both OA books and chapters have significantly higher use on social networks, higher coverage in the mass media and blogs, and evidence of higher rates of social impact in policy documents. OA chapters have higher rates of coverage on Wikipedia than their non-OA equivalents and are more likely to be shared on Mendeley.”<sup>1</sup>

Our open access book content is read on average **16 times more** and reached **almost twice the number of countries** than our traditional monographs in the first 6 months of publication.

All the content that is made open access is hosted on our Taylor & Francis eBook site and are sent to **major distributors** such as Google Books, Kindle, OAPEN and the Open Research Library to **increase the exposure** of the research. These sources increase the touchpoint researchers have to **access work globally and without barriers**.

We offer **flexibility** with the Creative Commons licence types available to fit your author and funder needs.

It is our belief that the option to publish open access is available to as many researchers as possible. To help achieve this **we offer discounts** on the Book Processing Charge (BPC) normally required to publish in the Taylor & Francis Books Open Access programme to eligible researchers, our editors are happy to guide researchers through this process.

Retrospective conversion opens the readership of your work as it can be found online without barriers. It means that the general public will be able to **access and explore your research** allowing learners to upskill in the areas that interest them without the financial constraints that may hold some back.

Our Author Marketing team can **support researchers with self-promotion** of your book or chapter once it is open access. Support can include creating flyers and emails to share with your network, designing banner artwork to share on your social media platforms and more.

The hardback copy of your title will still be **promoted by our global sales and marketing team**, with **print royalties** continued to be paid.

## BENEFITS OF OPEN ACCESS

## HOW TO CONVERT YOUR TITLE RETROSPECTIVELY

As your work has already been published by Taylor & Francis, there is no need for the work to go through a second peer review process to convert your content to open access. There are no changes or additions needed to the content for the open access version.

- Your **contract will be updated** with an open access addendum - this will set out the Creative Commons licence that your work will be published under.
- Your editorial contact will take you through how to pay the **Books Processing Charge (BPC)**.
- Your work will be **converted to open access**. In practical terms this means that the title will be flagged as open access on Routledge.com with an open access symbol and **readers from around the globe** will be able to access your work on our eBook platform TaylorFrancis.com.

Once the title is converted, it doesn't stop at Taylor & Francis platforms. We send a record of your work to **OAPEN** and the **Open Research Library**, two of the largest open access books repositories.

We also have 30+ metadata feeds to platforms such as **Google Books** and **Amazon** where readers outside of academic institutions can access your work, benefiting independent researchers across the globe.

<sup>1</sup> Taylor, M. *An altmetric attention advantage for open access books in the humanities and social sciences*. *Scientometrics* 125, 2523–2543 (2020). <https://doi.org/10.1007/s11192-020-03735-8>

## HOW MUCH IS THE BPC?

The BPC for retrospective open access enables researchers to discover your work and not be barred by subscription fees or download costs.

For work converted to open access retrospectively Taylor & Francis operate a tiered discount system for both books and chapters.

### Full Book or Chapter

12 - 24 months post-publication	30% Discount
24 - 36 months post-publication	50% Discount
36 + months post-publication	70% Discount

**To request a book or chapter retrospective quote, please contact the Open Access Books Team**
